Investing is another way to save and build your nest egg. But what's the difference between saving and investing?

When you save money, you're putting it into a relatively safe place to use in the future. Saving can be likened to 'deferred spending', for example saving for a holiday.

When you invest your money, you're making an active decision to put your money into an asset with the aim of generating a profit. All investing involves risk and different types of investment involve different levels of risk. As well as making a profit, you could also experience a loss.

Your investment goals, the level of risk you're willing to take and your investment timeframe can all influence where you choose to invest your money. You may have a property dream, want to set your kids up for the future, or be looking to save more so you can live comfortably in retirement.

If you're wondering where to invest money to get good returns, the answer is that it depends on many factors and there's no one-size-fits-all formula for a successful investment strategy. At Prime Global Trade Ltd, you will receive profit every day, including none official days. You will enjoy perpetual returns each day of the as you deposit and invest.
